

# CARL SPACKLER OPEN MOBILE WEBSITE

The Carl Spackler Open is designed with a full website for pre-Spackler planning and a mobile website to use during Spackler-week. The event does not distribute hand-outs or conduct daily informational meetings, but provides and pushes real-time information to 70 smart phones.

Our mobile website is not glamorous, but was built specifically for all smart phones. We ask each golfer to spend 10 minutes and setup their smartphone prior to the event. This is our opportunity to verify with each golfer that they can access the mobile website and understand how to obtain information.

We ask that each golfer complete the following exercise. Please do not use tablets, laptops, or desktops, but only your smartphone. Each golfer is being asked to locate 4 pieces of information. These actions will ensure you are fully capable and ready to obtain real-time information during Spackler-week.

- (1) You found Greg Garrett's wedge on the 12th green. Find a way to call or text him.
- (2) Mike Lewis lost his ball and nobody knows what to do. Find "Lost Ball" under the Rules section.
- (3) You finished golf at 2:00pm on Sunday. What time is the Skills Challenge Contest?
- (4) What is my tee time for Round 2? Who are my playing partners?

Feel free to get comfortable with the mobile website. The website can provide basic golf rules, itinerary, handicapping, Leaderboards, fellow golfer contact info, and a lot more.

Golfers who requested scoring access were granted scoring access. The scoring system will appear inside mobile on June 5.

## How do I sign-in?

The mobile website is **m.poststats.com**. This is the letter m followed by a dot. Then poststats dot com. A login screen should appear.

**STOP!** Bookmark this login page on your phone before proceeding. You will forget the web address.

The username and password are the same as full website. Remember they are both case sensitive. Many smartphones auto capitalize the first letter when trying to enter username. Be advised.

The Poststats server will push automated personalized daily agendas to you each morning. Make sure that your email, phone, and cell carrier are accurate.

Thank you for your time.
