

CARL SPACKLER OPEN

Rooming List Build

OVERVIEW

Building a successful rooming list involves streamlining rooms, single occupancy, and roommates to include everyone. All participants are required to select their rooming preferences. Hotel reservations will be modified soon with a rooming list to be completed when all cancellations are known.

RETURNING PARTICIPANTS

Everyone is required to select at least 5 roommates and rank them. Referrals bringing a rookie should assume their rookie will cancel and provide at least 5 roommate preferences. Providing roommate preferences is providing flexibility and contributing to the event. Do not forget to include the golfers you have referred over the years.

ROOKIES & REFERRALS

Rookies are required to select a minimum of 5 roommate preferences because the computer requires everyone to do it. Rookies will share a hotel room with their top preference.

ROOM STRUCTURE

The Carl Spackler Open is organized 9 months in advance based on both single and double occupancy and a roster divisible by four. Hotels are selected using multiple factors, but one of the primary factors is lowering the cost with volume.

Our event is not organized for local golfers wanting to sleep at their house, golfers to bring wives or family on vacation, golfers looking for partial participation, or golfers to pay for hotel rooms through corporate points.

ROOMING PROTECTION

The Carl Spackler Open could have golfers who do not generate a roommate preference. Participants without a roommate preference will be presented with two options. (1) a full refund or (2) a single occupancy room if available. This process is straightforward and comes without an awkward discussion.

SINGLE OCCUPANCY

Single occupancy rooms are available at the Carl Spackler Open. An odd number of single occupancy rooms reserved costs the Carl Spackler Open somewhere between \$300 and \$450. A single participant who returns to double occupancy is granted a Phase 1 volunteer exemption to the following event.

ROOMMATE MATCHING SYSTEM

There is a process followed to assign roommates to hotel rooms. The following is a link to the Roommate Matching System.
